

T.S.V. Subrahmanyam

Aspiring Data Analyst

Andhra Pradesh, India — +91-9398699045

krishnatutttagunta7@gmail.com — github.com/surya775577 — linkedin.com/in/surya-tutttagunta

Professional Summary

B. Tech student in Artificial Intelligence and Machine Learning with hands-on experience in data analytics, SQL, Power BI, and Snowflake. Built interactive dashboards and automated data workflows to improve reporting efficiency. Reduced manual processing by 70% in an internship project and increased report generation speed by 65% through data modeling optimizations. Seeking a Data Analytics Apprenticeship starting March 2026 to apply SQL, business intelligence, and cloud data skills in real-world business settings.

Technical Skills

- **Programming & Data Analysis:** Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, OpenCV), SQL (Joins, CTEs, Window Functions, Query Optimization), Java, C++, C
- **Business Intelligence & Visualization:** Power BI (DAX, Power Query, Data Modeling, Dashboard Design, Row-Level Security), Excel (Pivot Tables, VLOOKUP, Power Query)
- **Cloud & Data Engineering:** Snowflake (Data Warehousing, Query Performance Tuning, Role-Based Access Control), ETL Pipelines, Data Modeling (Star Schema, Snowflake Schema)
- **Tools & Platforms:** Power Automate, SharePoint, Jupyter Notebook, VS Code, Git/GitHub, Docker
- **Web Development:** HTML, CSS, JavaScript

Professional Experience

Data Specialist Intern

Technical Hub, Andhra Pradesh, India

May 2025 – June 2025

- Developed Automated Invoice Generator using Power Automate, Excel, SharePoint, and Outlook to extract order data, generate invoices, and send emails automatically.
- Streamlined billing and reporting workflows, reducing manual effort by 70% and accelerating invoice processing times.
- Designed ETL pipelines and Star Schema models to integrate multiple data sources, improving data accuracy and query performance by 65%.
- Optimized data flows in microservices architecture through query tuning, supporting reliable and efficient operations.

Projects

Automated Leave Approval & Management System

February 2025 – March 2025

- **Tech Stack:** Power BI, Power Automate, Excel, SharePoint, Outlook
- Created an automated Leave Approval System to digitize leave requests, streamline multi-level approval workflows, and maintain centralized records, improving process efficiency and reducing manual intervention. Implemented validation rules, error handling, and Row-Level Security in Power BI to eliminate manual data entry errors.

Face Recognition System

January 2025

- **Tech Stack:** Python, OpenCV, Scikit-learn
- Developed real-time face recognition application using supervised machine learning and computer vision methods.
 - Attained 94% accuracy in identification under varied lighting and angles via data preprocessing and model tuning.
- Optimized model for deployment and performance evaluation.

Personalized Portfolio Website

December 2024

- **Tech Stack:** HTML, CSS, JavaScript
- Designed responsive personal website to showcase data analytics and machine learning projects with smooth navigation and dark-mode UI.

Education

B.Tech in Artificial Intelligence & Machine Learning

2023 – Present

Aditya Engineering College, Surampalem — CPI: 8.03/10

Certifications

- Microsoft Certified: Power BI Data Analyst Associate
- Snowflake SnowPro Core Certification
- Cisco Python Programming Certification
- GeeksforGeeks Advanced SQL Certification
- Oracle Certified Java Programmer

Achievements

- Secured 1st position in World Robotics Championship 2024 among 20 teams through AI and automation integration.
- Ranked 10th in Aditya Shuttle Championship 2024 among 50+ participants.
